Kompac Series

Portable Air Conditioners and Heat Pumps

the next
Wave
in **Portable**
climate control

Comfortable, **Cool**,
Beautiful, spaces.
Anywhere, anytime.

Kompac

Kompac units are ideal for:

- Interior offices
- Communications/switching rooms
- Basements
- Computer rooms
- Labs and examination rooms

- Pressure-actuated regulating valve keeps water usage the lowest possible
- Integral condensate pump never needs priming and removes condensate automatically
- 115 volt (Koolette and Kompac) or 230 volt power (Kompac and King Kompac)

- Permanent filter slides out for easy cleaning
- Rubber feet keeps shelf units stable (Koolette)
- Heat pump option for heating and cooling on demand

Hard start kit standard

Dual evaporator fans for more even air distribution over the evaporator coil

 **Koldwave**[®]

The Kompac Series is an attractive **solution** for **spaces** of all sizes.

Because they provide climate control for specialized areas at specific times, Kompac units are uniquely able to provide comfort with cost-effectiveness for a variety of industries.

Kompac

Emergency. Temporary. Permanent cooling needs.

Commercial

Kompac units are a smart complement to any central air conditioning system. In today's commercial spaces, office personnel often work after hours or on weekends when central air is either off or dramatically reduced. To be productive, however, they need to be comfortable. Kompac units can supplement a central air conditioning system during off hours and provide backup if the central system goes down.

Health care

Clinical facilities have a unique interest in the comfort of their practitioners and patients. Medical areas frequently have localized cooling needs that cannot be met by their central air conditioning system. For example, some diagnostic equipment gives off more heat than many air systems were originally designed to handle: creating uncomfortable patient conditions and inefficient operational temperatures. Kompac air conditioners return climate control to your rooms and provide cool, comfortable surroundings for patients undergoing MRIs, CAT scans, and other procedures. For emergencies, Kompac's portability makes it easy to move cooling power to where it's needed.

Koldwave works wherever you do.

Industrial

Cool, comfortable conditions are often a hot commodity in factories, warehouses, and laboratories. Workers in these spaces can benefit greatly from a productive boost of supplemental cooling. And Kompac air conditioners go where other systems cannot. They perform beautifully for interior work areas with no windows and no outside air ventilation. Easy access to water and drainage in many industrial and laboratory settings makes Kompac air conditioners a quick and effective solution to less-than-ideal conditions – for a few hours, a few days or a few years.

King Kompac

The Koldwave Kompac Series.
We've got **Performance**
down **cold.**

**No windows.
No worries.**

Kompac's next generation of portable air conditioners and heat pumps are as beautiful as they are powerful. Through innovation and craftsmanship, the KoldWave Kompac Series helps you bring cool, productive, comfortable air conditioning and dehumidification to any windowless room. It's on-demand, effective climate control for areas where conventional air conditioners won't work. Controlled moisture levels reduce mold and provide greater comfort. From commercial spaces, to industrial and health care areas, the Kompac Series is the easy and attractive way to instantly improve work space conditions.

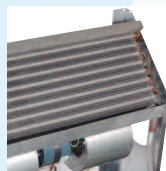

All Kompac models represent the ultimate in comprehensive design. They are built for convenience because they are entirely self-contained and easily portable (all you need is a water supply and drain). They are built for comfort because they incorporate electronic controls (including an available remote control), adjustable thermostat and multi-directional air flow. They are built for durability with heavy duty blowers and accumulators. And they are built for beauty with premium brushed stainless steel cabinetry.

So when you need permanent, supplemental or emergency spot cooling, discover the Kompac Series water-cooled air conditioners – the Koolette, the Kompac and the King Kompac. You'll find the new wave in reliable, flexible and convenient cooling performance.

The Koldwave Kompac Series helps turn static work spaces into cool, comfortable, dynamic areas.

Features & Benefits

- Electronic controls with temperature display, diagnostics and compressor protection built-in
- An infrared remote control is available that allows adjustment of temperature setpoint, fan speed, on/off control, and choice of cooling or heating where appropriate
- Quiet and efficient
- Adjustable thermostat for temperature control
- Two-speed fan for user-controlled air-flow
- Multi-directional discharge grilles let you aim the air flow

Copper tube, aluminum fin evaporator coils

Coaxial condenser heat exchanger

Compressor with standard accumulator... mounted on rubber feet for quieter operation

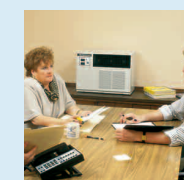

Condensate drain pump standard

Quick-connect hose fittings make installation a snap.

Shelf mounted units cool interior offices and meetings rooms where there is no access to outdoor air.

Brushed stainless steel cabinet provides exceptional durability and attractiveness.

Emergency. Temporary. Permanent cooling needs.
